

How can I retrieve a Power Vision Tune License I purchased previously?

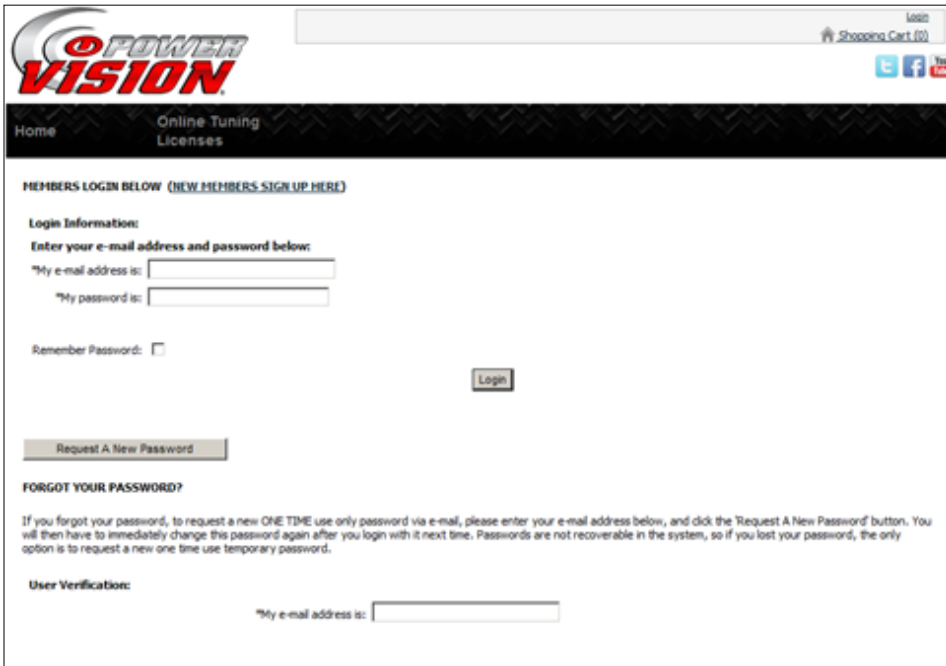

Our current Power Vision tune license system has been in place since January 2015. Any tune license you have used on this system is saved on your online account.

Open the WinPV software, and click on the Get License button

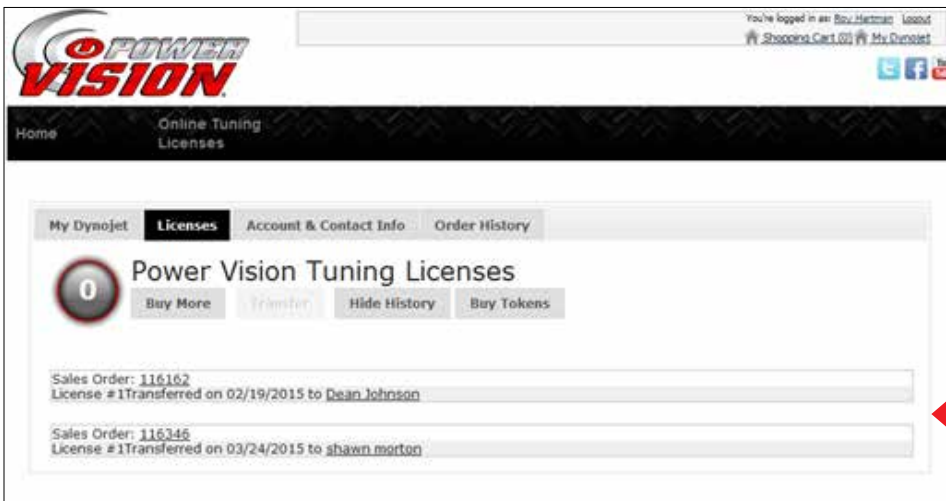

Click on My Account

Your default web browser should open to the screen.

Login with the correct email address and password.

Once you are logged in>click on Licenses>Show History.

Every Tune License you have used should show up here. In addition every original tune (STK file) for that bike will be listed as well. You can download any tune license, or STK file. You can save and apply any tune license to any Power Vision. You cannot open the STK file, but you can email it to **pvtech@dynojet.com**, to be converted to a PVT tune, and returned to you.
